1.1 Cable Description

Optical fibres are housed in loose tubes that are made of high-modulus plastic and filled with waterproof compounds.

FRP(fiber reinforced plastic) is applied as central strength member.

Loose tubes are SZ stranded around the central strength member.

The cable core is covered with water blocking tape to prevent from water ingress.

Aramid yarns are wrapped around the inner sheath as peripheral strength member.

Polyethylene sheath is extruded around the aramid yarn.

Ripcord is added beneath Polyethylene sheath.
