

## **Handling Precautions and Prohibitions of Battery in Sat Meter**

### **Warning:**

Lithium ion batteries or Nickel metal hydride batteries are used in the meter. Do not use in extremely high temperature or extremely high pressure conditions. Abnormal chemical reaction may occur which will lead to the battery overheating, emitting smoke, igniting and/or bursting.

- (1) DO NOT incinerate or dispose the battery in fire or heat it;
- (2) DO NOT pierce the battery with a nail or other sharp objects, DO NOT strike it with a hammer, or step on it;
- (3) DO NOT immerse the battery in water or connect the positive(+) and negative(-) terminals with a metal objects such as necklaces, hair pins, etc.

### **Notice:**

The battery is only applicable to the charger which is supplied or appointed by the manufacturer of this meter.

The charging time should be a minimum of 5 hours for the first time, and it should not be charged over 12 hours after the first time.

Please keep your meter off when the battery is charging.

The battery should be stored within a temperature range of 0°C to 40°C.

When stored for a long period, charge the battery at least once per half month to prevent over discharge.

The battery is expendable.

### **Handling:**

Improper connection of battery may lead to the battery bursting.

Please use only batteries supplied by the manufacturer.

Do not put the battery in fire or dispose of it in the garbage.

Please contact your waste administrative institute to get the nearest battery collection station.
